PRESENTATION

The educational offer of the True Neapolitan Pizza Association is aimed at all those who want to acquire or improve the knowledge of the production technique of the True Neapolitan Pizza. The courses have been designed to adapt perfectly to the needs of those who have little or no experience as pizza maker, but also to those who already have a minimum of experience in the sector, as well as entrepreneurs interested in investing in a project for a Neapolitan pizzeria.

The teaching method

The method consists in ensuring theoretical training with specialized teachers and practical training with the help of professionals in the field, trained in advance to teach, which, thanks to their experience, transfer knowledge and skills to their students.

This allows to know the theory and to learn directly the practical aspects of pizza making.

The training courses will take place in a classroom equipped with the most sophisticated technologies, and in 2 laboratories equipped with specific equipment of a professional laboratory.

Among the various equipment:

- certified wood, electric and gas ovens
- Retarder proofer system that allows to control the leavening activity of the product without any alterations
- fork kneaders, twin arms dough mixer capable of working even small quantities of flour
- Automatic divider and rounder machine
- Natural sourdough generator

Training plan

The paths to choose from are different. We start with the Basic Training, which takes 9 days, to learn the fundamental theoretical and practical knowledge.

Then you can choose among a variety of classes: interdisciplinary intensive courses that take 7 days (Advanced Training) in total and a course which the main goal is to improve practical skills, lasting 5 days (Extra Training). The two courses can also be chosen jointly to complete the training cycle "Verace" lasting 21 days.

The development of the Basic Training also allows to carry out the above courses in a non sequential way but at different times.
